SKIN ANALYSIS

A thorough Skin Analysis is the first step to healthier skin and is highly recommended before starting any treatment or skincare prescription. After cleansing, your skin will be examined using our Woods Lamp. Here, your Therapist can detect and analyse your skin's condition more accurately. This analysis, alongside your skin history, medical history, diet, lifestyle, and such factors, will allow us to create and prescribe a personalised Treatment and Skincare Plan.

The cost of your Skin Analysis is redeemable on skincare products and treatments.

For optimum results, Medilift Treatments are prescribed in a minimum course of 6 sessions.
